DOCUMENT REVISION HISTORY

Revision 1.0 Release of 1.1.4, Initial Version for the FieldView Management Suite (FMS)

SOFTWARE RELEASE NOTES FOR TANDBERG FIELDVIEW MANAGEMENT SUITE VERSION 1.1.4

Introduction

These release notes describe the new features and capabilities included in the TANDBERG FieldView Management Suite software version 1.1.4 released on 21 April 2008.

New Product Abstract

FieldView Management Suite

FieldView Management Suite allows multiple FieldView Devices and Applications on the network to be easily configured and updated. The FieldView Management Suite can also handle users and contacts list distribution, centralized status reporting of availability and software versions, and remote software update.

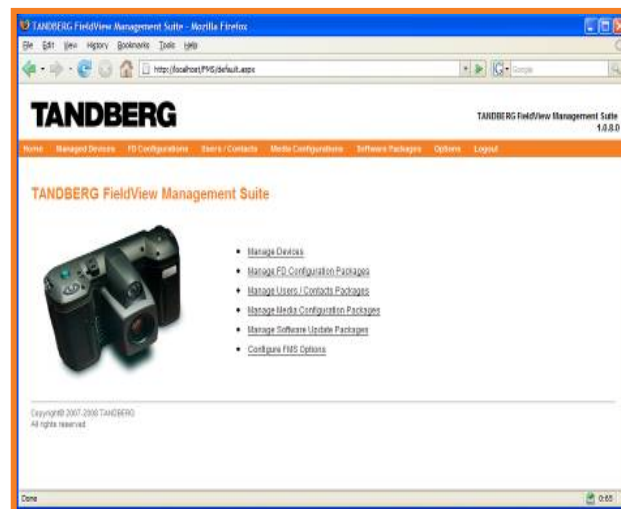

Figure 1: Management Suite

Changes and Improvements since Previous Version

Version 1.1.4 is the initial release of the TANDBERG FieldView Enterprise Suite.

Software

The FieldView Management Suite software contains one zip file, s51380fms114.zip that contains the file necessary for the software upgrade.

Installation

More information on the installation of the TANDBERG FieldView Enterprise Suite software can be obtained in document D14141 – TANDBERG FMS User Manual.
