## 1. Introduction

This release note is to describe the new features and changes included in the TANDBERG MCU software version D3.3 released on July 05, 2004.

## 2. Audience for this release

D3.3 is a minor release for the TANDBERG MCU. All users are recommended to upgrade the software in accordance with their particular service plan.

## 3. Software Versions

8 + 8 Version is capable of 8 Video Sites (IP/ISDN) and 8 Telephones

16 + 16 Version is capable of 16 Video Sites (IP/ISDN) and 16 Telephones

## 4. New Features in D3.3

### 4.1 Web Call List Timeout

It is now possible to enable/disable disconnected participant timeouts from the Web participant list during an ongoing conference. To disable the participant timeout simply uncheck "Timeout Participants from Call List" when creating the conference. If disabled, disconnected participants will remain in the participant list for the duration of the conference. This feature is enabled by default and disconnected participants will be removed from the list after 2 minutes.

### 4.2 Video Mute Participant

It is now possible to mute incoming video from a participant. When muted the participant will still receive video but will not be visible to other participants in the conference. To use this feature simply press the new action button  located in the participant list on the Web page to mute video and the action button  to un-mute video.

### 4.3 New Software Package without Encryption

There is now an additional software package available without DES or AES encryption. This software is available when Import/Export laws prohibit the shipping of encryption devices to certain countries.

## 5. Changes and Improvements in D3.3 from D3.2

- Increased size of Web participant list
- Improved video stability
- Improved audio handling during ISDN disconnection
- Improved handling of long site names
- Improved stability under heavy load
- Improved video robustness to allow for QCIF in CP layouts
- Improved handling of Duo Video
