1. Introduction

This release note is to describe the new features and changes included in the TANDBERG MCU software version D3.7 released on October 21, 2005.

2. Audience for this release

D3.7 is a minor release for the TANDBERG MCU. All users are recommended to upgrade the software in accordance with their particular service plan.

3. Software Versions

Since the release of D3.6, the TANDBERG MCU supports an IP-only version of the software for customers who do not need ISDN built-in to the product. This version can be later upgraded through software to include ISDN if the need arises.

3.1 IP Only

8 + 8 Version is capable of 8 Video Sites (IP) and 8 Telephones (VoIP)
16 + 16 Version is capable of 16 Video Sites (IP) and 16 Telephones (VoIP)

3.2 IP/ISDN

8 + 8 Version is capable of 8 Video Sites (IP/ISDN) and 8 Telephones
16 + 16 Version is capable of 16 Video Sites (IP/ISDN) and 16 Telephones

4. New Features in D3.7

D3.7 is a maintenance release only and does not include any new features or functionality when compared to D3.6

5. Changes and Improvements in D3.7 from D3.6

- Increased jitter buffer to 200ms for networks with long delays
- Increased Web server timeout for networks with long delays
- Resolved issue where authentication traps were reported too often
- Resolved issue where sites could be disconnected after 1 site was disconnected from a conference
- Resolved issue where terminal names may not have been present in conferences not utilizing the Welcome Screen
- Resolved issue where incoming video from a Polycom PVX was not recognized correctly and was reported as "Off"
- Resolved issue where outgoing video was transmitted as 4CIF when the active speaker was a Polycom PVX
